SWING TRADING SIGNALS

The Trend is our Friend

This Tool is used to swing trade the biggest wave of a pattern.

In order to increase the probability of buying the wave 3 up, or selling the wave 3 down, it's important to swim upstream, follow the Trend and wait for the following:

- a Higher Low followed by a new LONG signal of the TrendTrading Indicator, **BUY**, 2% of assets. **Stop Loss** is set at Low -0.01 with a max of 5%. The stop loss will be changed to break even when the position is 3% in the money. Furthermore, a **trailing stop** of 4% is set.
- a Lower High followed by a new SHORT signal of the TrendTrading Indicator, **SELL**, 2% of assets. **Stop Loss** is set at High +0.01 with a max of 4%. The stop loss will be changed to break even when the position is 3% in the money. Furthermore, a **trailing stop** of 4% is set.
